

Behavioral cloning, from recorded views to bounded simulator commands

The same image-to-steering path supports training, runtime inference, and offline replay.

TRAINING OBSERVATIONS

three synchronized simulator cameras

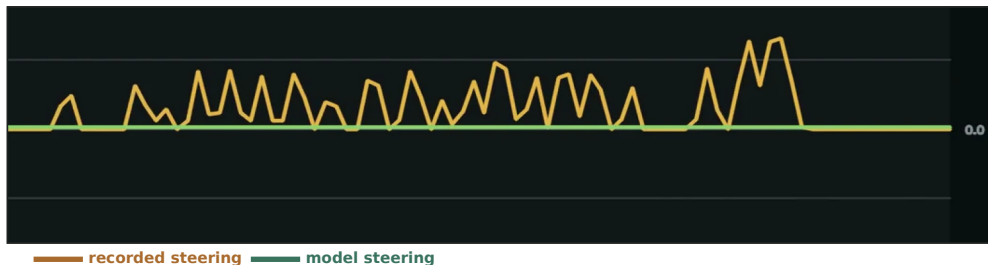

driving log → balance 25 bins → seed 42 / 80:20 split → augment

SHARED MODEL SPINE

OFFLINE REPLAY DIAGNOSTIC

180 consecutive recorded frames

SIMULATOR LOOP

center frame + speed in, bounded commands out

↑ commands telemetry ↓

HISTORICAL NOTEBOOK

10 epochs

best val. MSE 0.07077
at epoch 4

ONE RUN · OFFLINE ONLY

Incomplete seed and hardware record. Not a lane-keeping, recovery, intervention, or completion metric.

SIMULATOR ONLY · OFFLINE EVIDENCE IS DIAGNOSTIC
